Builds Confidence

Improves Trust and Respect

Challenging and FUN!

Develops Communication

Horses Become

Trail and Traffic Clinics are specifically designed for you and your horse to build confidence and safety through simulation. These clinics slowly introduce various obstacles that you and your horse will encounter while riding. Both you and your horse are then trained to deal with situations by using various techniques that prove to your horse that you are a confident and trusting leader. The end result is a confident, mutually trusting team. Ask about our advanced clinics!
